FRAMAX

CAN BLOCK 6/6/1-LE

Fully automatic electronic canning machine. Rinsing, isobaric Beer, Cider, Soft Drinks, Wine, etc.

The CANBLOCK is a fully automatic electronic canning machine including a 6 position rinser, 6 valve electro-pneumatic counterpressure filler and a single-head seamer with automatic lid dispensing system.

Each phase can be fully programmed

Details

- Sturdy frame, resistant to bending and vibrations
- Rinsing by tilting the cans 180°
- Automatic filling cycle (electro-pneumatic)
- Electronic control of the different phases, with settings adjustable from the operator's panel
- Multiple CO2 flushing system to minimize oxygen pickup
- Buffer tank included to provide constant product supply
- Easy and fast maintenance operations
- CIP predisposition
- All parts in contact with the product made in stainless steel AISI 304 or AISI 316.
